DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 11 provides for the use of phenylethanediol derivative in optical element, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 11 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

2. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim language “preferably” is indefinite.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1756

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-5, 8-11 are rejected under 35 U.S.C. 102(b)/(e) as being anticipated by WO 02/40,614 or equivalent US 2004/0,026,660.

The reference discloses photoisomerizable compounds of formula I, which are particularly suitable for the preparation of cholesteric films or layers with planar alignment. Such layers or films show selective reflection of visible light that is circularly polarized, caused by interaction of incident light with the helically twisted structure of the cholesteric material (see section [0241] of US '660). The reference further teaches a liquid crystal display comprising an optical component, in particular a broadband reflective polarizer or color filter, comprising a compound of formula I (see section [0035]. See schemes 2 and 3 in the references, which read on the claimed method. The compounds of the references are phenylethanediol derivatives containing a photoconvertible unit and a polymerizable group (acrylate). Also, see Example 1 and compounds (3)-(9) on pages 21-23.

The references anticipate the claimed invention.

Allowable Subject Matter

Art Unit: 1756

5. Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
